

Editorial: Sources, Processing, Transport, Health and Climate Impacts of Air Pollutants

Satoshi Irei and Tak Wai Chan

Applied Sciences 14(4), 2024, doi: 10.3390/app14041361.

This is the review written by Dr. Irei from the NIMD and Dr. Chan from the Environment and Climate Change Canada for the special issue “Sources, Processing, Transport, Health and Climate Impacts of Air Pollutants” published in the Applied Sciences, a MDPI journal. It summarized the overview of 9 articles published in this special issue. The information in this issue will contribute to the direction of future atmospheric pollution research and implementation of better air quality policies in future.

The banner features the Applied Sciences logo on the left, which includes an icon of three test tubes and the journal title. To the right are two circular metrics: a yellow one for Impact Factor (2.679) and a blue one for CiteScore (3.0). The central text identifies the special issue title and guest editors. A deadline is listed in the bottom left, and the URL is provided at the bottom left. The bottom right corner features the 'Special Issue' text and an 'Invitation to submit' call to action.
